SIJ RECERTIFICATION ANNOUNCEMENT

1. I have worked very hard to make this both relevant and useful. I hope it is very helpful to you and that it enhances your practice while making it a simpler process. You will see that the Most Common Pattern is greatly simplified, which is a true time saver.
2. If your 2-year certification has "expired" within the past year, your listing has remained on the website, and you have been graced with continued certification until April 15, 2024.
3. Timeline: Given our busy personal and clinical lives, please complete the process on April 15, 2024. Please communicate should you need an extension.
4. FEE 99.00. There is a link on the home page and in the store of www.HeschInstitute.com. The duration of the recertification is 2-years from the date I receive your test, grade it, and award your Recertification certificate.
5. The recertification process includes reading and viewing videos. The goal is to impart new info and perhaps reinforce some prior knowledge. There is a short list of questions you need to complete with a passing grade of 70%. Dr. Hesch is available to assist if you have any questions regarding the material, including the post-test.
6. There may be more than one correct answer, so please read all selections before answering.
7. 2.0 CE/CEU's were approved by CO Chapter APTA through CEU Locker. Please review your state's requirements. Many states allow reciprocity.

Should you recommend the online course to your colleagues, please refer them to the home page of the Hesch Institute which will then direct them to PesiRehab.com to complete the purchase and it is coded to give a much higher % to the Institute. Please note that we also have a whole-body course on the website. If your facility would like to host a Hesch workshop, please contact Jerry Hesch. Please let us know if you have any questions.

Thank you,

Jerry and Karin Hesch, Hesch Institute
